Education

St. Louis, Missouri	Ranken Technical College	2019-2021
<ul style="list-style-type: none">• Associates in Application and Web Development		GPA: 3.6

Employment

ISP Intern	Progressive Broadband	May 2020 – August 2020
<ul style="list-style-type: none">• Helped monitor the systems to make sure things were running smoothly• Went to locations to test signal strength and set up dishes if signal was acceptable• Worked with experienced network engineers to expand infrastructure• Helped set up advertising and managing the google business account		
Retail Worker	Krispy Kream	May 2017- August 2017
<ul style="list-style-type: none">• Managed the shop over the nights in preparation for the morning.• Had deal with intense time management as I was required to manage and clean the shop, run the drive through, catch and decorate the doughnuts, and set up the display. All of this was done on my own, and had to be completed before first shift came in.		

Projects

Emoji Website

- Built with Node, Express, jQuery, html/css, SQL, Json web tokens, Bootstrap
- Made as a form that allows you to create and log into an account, browse and vote on the form, leave comments on each item, and as an admin you have full crud control over the form items and the accounts.
- This was a project that was worked on over the second half of the course where we routinely modified the project to add the new skills we learned.

Credit Union

- Built with Node, Express, SendGrid, jQuery, html/css, MongoDB, Json web tokens, Bootstrap
- Made as a bank account management site. In this website you can create/log into an account, subscribe to a mailing list for promotions and updates, manage your accounts, transfer money between accounts, add notes to transactions that have happened on your account, and if admin full crud control for managing people and their accounts.
